# Morning Routine of Get My Kid to School

# Estimated Average Flow Time

Morning Start	30 mins
Prepare Breakfast	20 mins
Waking Him Up	10 mins
Get Dressed	10 mins
Fresh Up	10 mins
Eat Breakfast	30 mins
Check Backpack	10 mins
Walk to Bus Stop	5 mins
Get on Bus	2 mins
Estimated Cycle Time	2 hours 7 mins

# Optimize My Processes

## ◆ Eliminating Waste

I can eliminate 10 minutes from morning start if I read news after he went to school. I can eliminate 5 minutes if I wake him up before I start preparing breakfast. I can eliminate 5 minutes if I check his backpack the night before.

## ◆ Workflow Orchestration

If I move check backpack the night before, I can check his stuff and pack the snacks. It will make more sense. If he can get dressed and fresh up while I am preparing breakfast. It will be more efficient.

## ◆ Workflow Orchestration

The vulnerability assessment uncovers is that my kid does not do what I think he suppose to do while I am preparing breakfast.
